

Your Single Source for Fasteners and Metal Components

Service & Dependability for Your Critical Application

Stock & Custom Parts Delivered When & Where You Need Them

Engineered Metal Components	Bolts	Threaded Studs & Inserts	Custom Fasteners & Pins
			
Standoffs, Spacers, Screws, Fittings, Couplings, Flanges	Standard and Heavy Hex, B7, Flanges	Hex, Castle, Square, Round, High, Cap, Slotted, etc.	Full Thread, Tapered, Collar, Double/Tap/Single End

Hex Head	Socket Head	Button Head	Flat Head
			

Quality Standards - Certifications & Registrations include:

Standard Inch IFI Industrial Fastener Institute; Metric IFI Industrial Fastener Institute; API Q1; AS9100:D Certified; ASME; ASTM DIN; DFARS; ISO 9001:2008 / 2015 Certified; ITAR Compliant; PED; Reach; ROHS Compliant; SAE; Customer Prints

Materials

Alloy Steel, Aluminum, Brass, bronze, Carbon Steel, Copper Alloys, Exotics, Gold, Hastelloy®, Inconel®, Monel®, Nickel Alloys, Stainless Steel, Kovar, 52 Alloy, Silver, Platinum, and Titanium

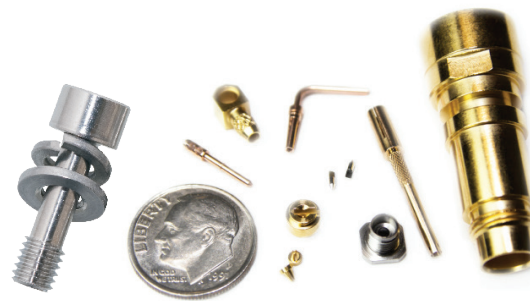

API-20E
 Registration No. Q1-3701
 Manufacturer and Supply
 of Industrial Fasteners

One Source for Expert Engineering & Precision Manufacturing of Quality Fasteners & Metal Components

Capabilities & Services Include but are not Limited to:

- Precision Cold Forming and Form Rolling
- Precision CNC Manufacturing
- Precision Wire Forming
- Catalog, Stocked and Custom Inventory
- Short Runs and High Volume

Engineering Assistance

MW Components' engineers are skilled in fastener design, engineering, material selection, and corrosion finishes to help solve product development challenges. Involving our engineers at the developmental stages of your product could save time and money in production.

Quality Control

As requirements become more complicated, more accurate testing equipment is required to ensure compliance with customer specifications. Our experienced quality control team, along with modern testing equipment and the newest manufacturing systems, result in high quality fasteners and custom related products.
