## Aerospace Spring & Component Manufacturing

### The Quality You Need for Mission-Critical Components

Capital Spring's aerospace springs, wire forms, and stampings are commonly specified in mission-critical components, so everything we do meets the aerospace industry's rigorous system safety and performance standards.

Our customers know our aerospace components will continue performing as specified year after year - even in the most extreme operating conditions imaginable.

## Military & Defense Metal Part Manufacturing

### Reliability and Performance When You Need it Most

We've been supplying military and defense components for over 50 years. Our parts are used in military ground, air, and support systems.

With years of experience in the industry, we offer the option to cross-reference military standard springs and National Stock Number (NSN) parts. We also offer government source inspections on site and non-restricted drawings on file.

### Materials

Beryllium Copper  
Carbon Steel  
Hastelloy  
Inconel  
Stainless Steel  
Titanium

### Finishes

Dykem  
E-Coat  
Nylon  
Paint  
Powder Coat  
Teflon

### Plating

Black Oxide  
Cadmium  
Gold  
Nickel  
Phosphate  
Tin  
Zinc
