Medical Grade
316 Stainless Steel Springs

Overview
Century Spring offers over 7,000 spring designs in 316 stainless steel per ASTM A313 standards. Century’s 316 stainless steel springs are available for direct sale or catalog use.

They are often leveraged within the medical industry for healthcare products, medical devices, pharmaceuticals, and more.

Advantages of 316 Stainless Steel
316 stainless steel is a common alternative to 302/304 stainless steel and offers numerous advantages including:

- Superior corrosion resistance compared to 302/304
- Higher resistance to pitting and crevice corrosion in chloride environments
- Excellent forming and welding characteristics
- Easy to clean
